

Inflation Products

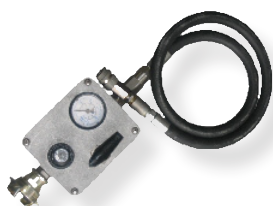

The NEW BlastBall™ hole blocker is revolutionary in product design and now MTi Group provide numerous turnkey solutions to make the use of the BlastBall and Aero products easy and hassle free. With extensive Underground experience, MTi Group have engineered several durable inflation options to allow the you to utilise all the advantages and benefits of the BlastBall™ and Aero products.

Underground Hose Reel with Inflation/Deflation unit (part #: UG-HR)

The Underground Hose Reel is a complete air service unit complete with inflator/deflator for the BlastBall plugs and BlastBag-Aero and includes 50m of Teflon lined thermoplastic hose complete with anodized crimps to indicate depth. Located on the end of the hose is MTi Groups' patented coupling for connection with the BlastBall or BlastBag Aero. The unit is complete with a high flow inflation and deflation lever using a venturi for deflation. The Underground Hose Reel is maintenance free and compatible with any service airline underground. Made to order with the coupling of your choice, the lightweight and powder coated frame is built for longevity.

Underground Pendant (part #: UG-I-P)

Fitted with a minsup coupling for universal connection the underground pendant is a compact and durable solution for inflation control. Complete with a regulator, gauge and Swagelok valve housed inside a die-cast impact resistant enclosure, the pendant has a hermetic SS swivel for hose management and is ideally suited to drill rigs or mobile equipment. Can also be used as a compact adaptor for explosive trucks.
