

Measuring Products

MTi Group offer an extensive range in measuring equipment for the mining Industry. All Tape measures are compliant with mining regulations relating to conductivity and non ferrous end condition requirements. All tape measures have been selected for ease of use and durability. With consideration of environment and corrosive agents MTi have selected top quality measuring tapes at competitive prices.

Cordwheel (part # M-Wheel) *Each*

MTi Group are the chosen distributor for the Cordwheel, designed for military applications, the cordwheel can withstand most things a mine site could subject it to. The cordwheel is made from an impact resistant UV stabilised plastic and conveniently fits all MTi measuring products from surveyors tapes to MiTiMeasures to the new anticipated Thermo Measure.

Speed tape (part #: MTS series)

The 3X speed tape is available in a 30m and 50m model. With dual metric markings on a 12mm ribbon tape, the 3X speed tape is easy to read and durable. The ribbon is made from reinforced fiberglass and contains a mylar coating for wear resistance and protection from common chemicals in a blasting environment. This is an ideal measure for QA or any D & B dipping activity.

Manual Tape (part #: MT series)

The Manual tape is most likely your most common measuring tool. MTi carry an inexpensive but very durable manual tape measure. The ribbon is 12mm wide and marked on both sides with a two tone black and red on an easy to see and non reflective white background. The reels are made from a UV stabilized impact resistant plastic, ideal for all measuring applications and available in 30m, 50m and 100m lengths. Refills are also available and the open case design means you can easy rinse through with water after a long day of dragging around.
